Annual Subscription Rates 1985 (including postage and insurance)

For libraries, research establishments and all other multiple-reader institutions: combined subscription, 1-yr $1625.00; 2-yr $3087.50. Part A, Comparative Physiology $695.00; Part B, Comparative Biochemistry $695.00; Part C, Comparative Pharmacology and Toxicology $400.00 (2-yr subscription rates: Part A, $1325.50; Part B, $1325.50; Part C, $760.00).

Specially Reduced Rates to Individuals

In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription may purchase a second or additional subscription for personal use at the much reduced rate of $160.00 per annum (combined subscription). Part A, Comparative Physiology $75.00; Part B, Comparative Biochemistry $75.00; Part C, Comparative Pharmacology and Toxicology $60.00. Parts A and B: Three volumes of each part per year, four issues per volume (Part A—1st of the month; Part B—15th of the month). Part C: Three volumes per year, two issues per volume (commencing Vol. 50, No. 1, 1975).

Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

BIORHEOLOGY

The Official Journal of the International Society of Biorheology

Editors-in-Chief: A L COPLEY, *Laboratory of Biorheology, Polytechnic Institute of New York, 333 Jay Street, Brooklyn, NY 11201, USA* and A SILBERBERG, *Polymer Department, Weizmann Institute of Science, Rehovot, Israel*

Biorheology studies deformation and flow of biological systems or materials directly derived from living organisms. Such problems have assumed an increasing importance in physiology, medicine, surgery, botany and other biological disciplines.

The journal publishes work concerned with processes in the living organisms *in vivo* and with materials originating from the organisms (extracorporeal). The interrelationship is stressed between rheological properties of biological systems and their various structural aspects. Papers are welcomed for editorial consideration.

ARCHIVES OF ORAL BIOLOGY

Executive Editor: A E W MILES, *Department of Anatomy, London Hospital Medical College, Turner Street, London E1 2AD, UK*
Editorial Adviser: I R H KRAMER, *Institute of Dental Surgery, Eastman Dental Hospital, Gray's Inn Road, London, WC1, UK*
Assisted by an Editorial Board

Archives of Oral Biology is a multidisciplinary journal devoted to the publication of papers that advance current knowledge on every aspect of the vertebrate mouth and its related structures eg. teeth and salivary glands. Articles on human oral biology and experimental research carried out on other species but directed towards an understanding of the human state tend to predominate but by no means exclusively. The submission of papers from researchers interested in oral biology of non-human vertebrates is actively encouraged especially when the work concerns the structure, physiology or phylogeny of the mouth.
